

Tuesday, May 1		Topic / Title	
Chair:		Fundamental Physics	Presenter
8:50	9:00	Opening Remarks	
9:00	9:20	PICO and Decadal Context	Shaul Hanany
9:20	9:40	Inflation: how far down to push?	Raphael Flauger
9:40	10:00	N_eff and other high ell E-mode science	Dan Green
10:00	10:20	Primordial Magnetic fields	Levon Pogosian
10:20	10:55	Break	
Chair:		Fundamental Physics	Presenter
10:55	11:15	Neutrino Mass: astrophysics perspective	Joel Meyers
11:15	11:35	Neutrino Mass: a particle physics perspective	Andre Luiz de Gouvea
11:35	11:55	Constraints on DM from CMB Observations	Yacine Ali Haimoud
11:55	13:10	Lunch Break	
Chair:		Fundamental Physics / Extragalactic	Presenter
13:10	13:30	Constraints on Axion DM	Dan Grin
13:30	14:15	Summary + Discussion (Moderator: Dan Green): Kimberly Boddy, Francis-Yan Cyr-Racine, Daan Meerburg	
14:15	14:35	Extragalactic Science Overview	Nick Battaglia
14:35	15:05	Break	
Chair:		Extragalactic Science	Presenter
15:05	15:25	Reionization	Marcelo Alvarez
15:25	15:45	Clusters Science and Cosmology	Jean-Baptiste Melin
15:45	16:05	SZ Effects and Galaxy Formation	Jim Bartlett
16:05	16:25	Legacy Catalogs	Gianfranco de Zotti
16:25	16:45	Component Maps	Colin Hill

Wednesday, May 2		Topic / Title	
Chair:		Extragalactic Science	Presenter
9:00	9:20	Lensing	Alex van Engelen
9:20	9:40	Cross-Correlations	Marcel Schmittfull
9:40	10:25	Summary + Discussion (Moderator: Nick Battaglia):	
10:25	10:55	Break + Poster Session	
Chair:		Galactic Science	Presenter
10:55	11:15	Galactic Magnetic Fields	Francois Boulanger
11:15	11:35	Constraints on Star Formation	Laura Fissel
11:35	11:55	Grain alignment in clouds	Peter Ashton
11:55	12:15	ISM dust physics	Alex Lazarian
12:15	13:30	Lunch Break	
Chair:		Galactic Science + Foregrounds	Presenter
13:30	13:50	Turbulence in the ISM	Susan Clark
13:50	14:10	Composition of Dust	Brandon Hensley
14:10	14:30	Sky Models	
14:30	14:50	Foreground Subtraction + Component Reconstruction	
14:50	15:20	Break + Poster Session	
Chair:		Foregrounds + Technology	Presenter
15:20	16:05	Summary + Discussion (Moderator: Chuss): Boulanger, Jones, Clark	
16:05	16:25	Focal Plane Technologies	Roger O'Brient
16:25	16:45	Readout Technologies	Hannes Hubmayr
16:45	17:05	Optical Elements (Lenses, ARC, Modulators)	Jeff McMahon
17:05	17:25	Sub-K Coolers	Peter Shirron

Thursday, May 3		Topic / Title	
Chair:		Technology + Systematics	Presenter
9:00	9:15	Systematic Effects Overview	Brendan Crill
9:15	9:30	Beam/Polarization Systematics	Eric Hivon
9:30	9:45	Gain Stability	Maurizio Tomasi
9:15	9:30	Systematic Next Steps	Brendan Crill
9:30	10:15	Summary + Discussion (Moderator: Mike Niemack):	
10:15	10:35	Break	
Chair:		Other / Contributed ? / Report + Decadal Planning?	Presenter
10:35	10:55	The decadal process: timeline, what input when? how to best plug in?	TBD
10:55	11:15	Summary + Discussion: (Knox, Staggs, Lawrence) The pitch for space in the report; Other whitepapers? (more details of implementation/cost? technology? More details of science? Balance of Science vs. Implementation/Costing	
11:15	11:35		
11:35	12:20		
		Adjourn	
Posters
