Next month's job: follow up on new questions and probe agencies for data

Assign Management "Solutions" to 4 committee members

Fill in the "data" section of your Solution

(feel free to change the format of your data section as you like)

Use or add to "Resources" as necessary

Check for duplication in the other data sections

Check whether this has been done before (for solutions 2-4)

Assign "General Questions" and below to 1 committee member

Refine into queries (if not already specific enough)

Add data sections if needed

Cross correlate with data being requested from the "Solutions"

First run-through: NSF, NASA, DOE, AAC, NAS

What questions are already answered in existing plots and charts?

What questions exist in the database with appropriate query? What query?

What questions are not easily accessible?

Who else should we contact?

Schedule Next Meeting
