Proposed NMEA/ 1 pps Mux/Demux Distribution System (4/29/14)

All F/O DMPX/MPX units have one multimode fiber optic input and one multimode fiber optic output, one NMEA output and one 1 pps output.

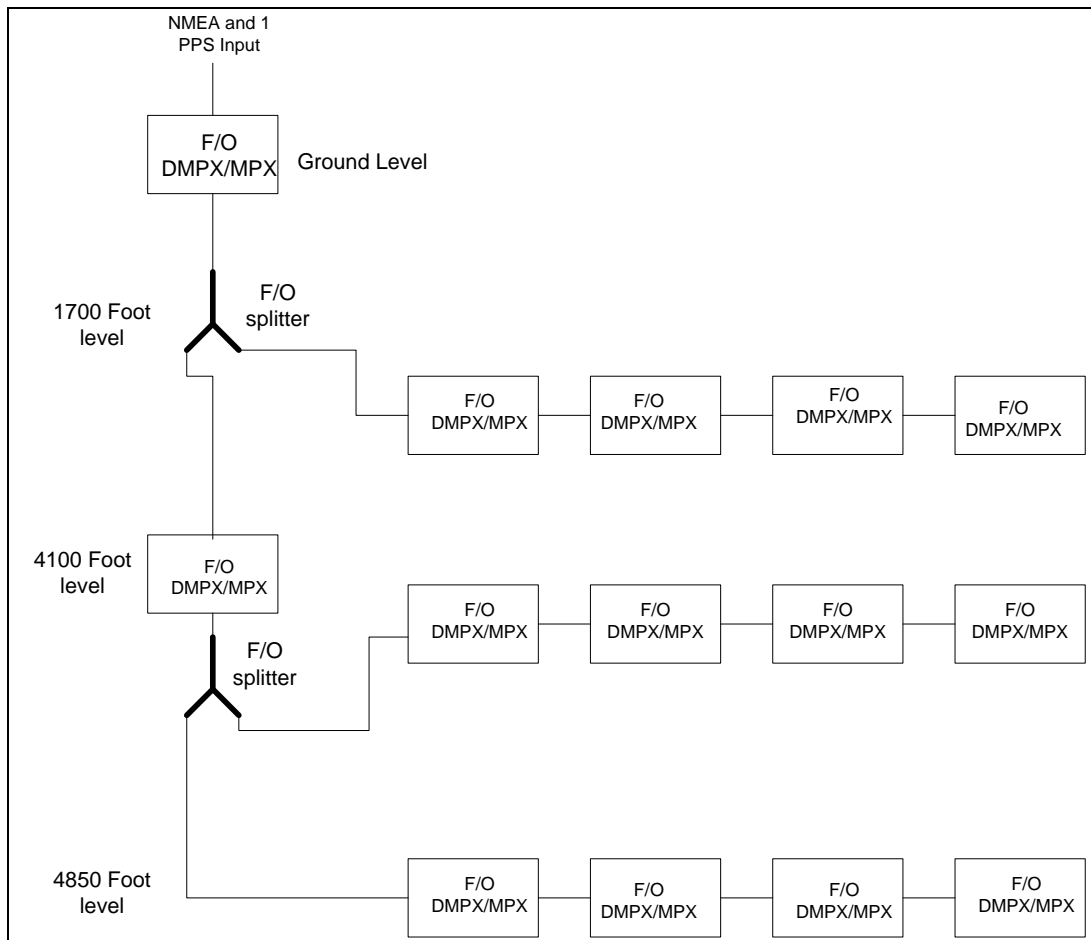

All F/O Splitter have one optical input port and two optical output ports.

All fiber optic units can tolerate an optical path loss of up to 10 dB between any transmit and receive port or a minimum of 3 Km between units.

Each F/O DMPX/MPX unit draws approximately 125 mA at 12 volts.

Note that there is no provision for expansion in this version
