

# Possible Study Activities - Telecons

- Define highest priority Science Goals
- Map science return vs. aperture, sensitivity, (assume full sky coverage)
- Determine optimal band selection with finite focal plane area
- Simulate range of foregrounds + subtraction (without assuming the input model)
- ...

# Possible Study Activities - Workshop

- Identify strengths of space and complementarity with future ground efforts
- What is the space mission worthwhile doing in the end of the next decade

# Possible Study Activities – Mission designs

- Mission Design Telecons
  - Imager alone; Spectrometer alone;
  - Imager + Spectrometer (same mission)
- Mission Design Sessions (@JPL)
